

Living in the NE part of MN, we do not have a wide range of radio stations that come in at home or in the vehicle. We bought XM radio to meet the needs that regular radio stations could not deliver. We enjoy all the stations very much. We also choose to pay for these services and I don't think that it is up to the NAB to take XM away. I respectfully urge you (NAB) to rethink your petition and support XM's ability to provide quality programming that I am paying for.
